

EDUCATION

Bachelors in Artificial Intelligence

2024 - 2028

Riphah International University , Sahiwal

CGPA: 3.93/ 4.0

SKILLS

- Machine Learning
- UI/UX Designing
- Teamwork
- Time Management
- Leadership
- Effective Communication
- Critical Thinking
- Languages:C++,Python,SQL
- Full-Stack Development

TOOLS

- Jupyter Notebook,
- Figma
- Pycharm
- XAMPP
- DEV C++
- Claude
- Gemini
- Chat GPT

CONTACT

- +92 303 0652292
- ayeshaach027@gmail.com
- Ganj Shakar Garden , Pakpattan

CERTIFICATES

- AI Fluency
- Claude Code 101
- Introduction to Claude Cowork

AYESHA SHAHID

STUDENT

PROFILE

Dedicated AI student in BSAI program, maintaining a consistent 3.97 GPA. I am skilled in full-stack development, data analysis using Python, and creating high-fidelity user interfaces in Figma. With a proven track record of academic excellence and practical experience in entrepreneurial project management, I am eager to contribute my skills in artificial intelligence and user experience design to forward-thinking software development projects.

PROJECTS

AromaMatch |AI & Machine Learning Developer

- Developed a content-based recommendation engine for fragrances utilizing NLP and unsupervised machine learning.
- Implemented TF-IDF vectorization and cosine similarity to compare fragrance profiles mathematically without a database.

BiteBase Full-Stack Database Developer (SQL)

- Engineered a relational database ecosystem for a food delivery system to manage restaurants, menus, and transactions.
- Built a functional administrative dashboard to track real-time order statuses using SQL-driven data management.

UI/UX DESIGN PROJECTS

- **Valora Montrose:** Designed a responsive, high-fidelity landing page for a luxury fashion brand using modern aesthetic principles.
- **Food Delivery App:** Developed a complete set of interactive screens and user flows in Figma, including custom components and prototypes.
- **Logistics Dashboard:** Prototyped specialized interfaces for business operations and driver management.
- Also worked on client real-based projects.

Smart Inventory Management System (Java)

- Completed a comprehensive inventory system covering key OOP concepts like inheritance and encapsulation.
- Developed features to track stock levels, manage supplier details, and generate automated stock alerts.

WORK EXPERIENCE

- Completed an Artificial Intelligence Internship at **DecodeLabs**, building projects spanning rule-based systems, supervised machine learning (KNN), and content-based recommendation engines using TF-IDF and cosine similarity.
- **Recommendation letter** from **DecodeLabs** available upon request.
- Currently Intern at **FlyRank AI** in Machine Learning ,Framed and scoped an ML capstone problem (content archetype clustering on 30K+ SEO/content records), defining task type, target proxy, success metrics, and unit of analysis to support data-driven content strategy decisions.
